	Fitness Enthusiasts

Test The Model

Evaluation is a process during the development of the model to check whether the model is the best fit for the given problem and corresponding data.

Load the saved model using load model

```
### Predicting our results

from tensorflow.keras.models import load_model
from keras.preprocessing import image
model = load_model("nutrition.h5") #loading the model for testing
```

Taking an image as input and checking the results

By using the model we are predicting the output for the given input image

```
index=['APPLES', 'BANANA', 'ORANGE','PINEAPPLE','WATERMELON']
result=str(index[pred[0]])
result
'PINEAPPLE'
```

The predicted class index name will be printed here.
